Project Type SaniStation® Bespoke Mobile Sanitisation Units and Face Mask Dispensers

Spire Hospital Leeds partnered with SaniStation® in the provision of bespoke Mobile Sanitisation Units and Face Mask Dispensers, to support the infection control process at their Leeds site. The units are designed for maximum visibility in high traffic areas and were delivered branded with Spire Healthcare logos and clear sanitisation messaging.

Throughout the process we worked closely with the team to discover their requirements and deliver bespoke units that have gone straight onto the frontline to support the infection control fight.

Key Requirements of the Spire Hospital Leeds Team:

- ✔ A way of ensuring that all visitors and staff had easy access to hand gel and face masks.
- ✔ Strong promotion of their corporate image.
- ✔ The ability to include their own variable messaging and keep it updated over time.
- ✔ They needed flexibility to configure each unit individually to suit the specific locations where they were being deployed.
- ✔ Ensuring the units were accessible for all users, including paediatric patients.
- ✔ They wanted units to be mobile so they could be moved as needed.
- ✔ They needed units for both internal use in clinical areas and for external use (under cover) on entrances.
- ✔ They wanted to make use of their own gel dispensers.

Spire Hospital Leeds

Process Steps

from Initial Discussions to Delivery:

1. We visited the site in central Leeds, discussed their needs and put forward design suggestions and 3D visualisations.
2. The design went through several iterations to ensure all of the Spire team's requirements were accommodated.
3. Spire's own gel dispensers were collected so they could be factory fitted to the units
4. The units were manufactured in our own factory with progress update pictures keeping the Spire team in touch.
5. We delivered the fully assembled units to the hospital, ready for immediate use.

Infection Prevention Lead, Spire Hospital Leeds:
"Just to say the SaniStations look amazing, very professional and will support compliance with the best practice. Many thanks for your support and patience."

Chris Anderson, Director at SaniStation® said:
"It's been an amazing experience to work with the team at Spire Hospital Leeds in the development of these bespoke Mobile Infection Control Units and Face Mask Dispensers. To see them in place around the hospital really brings home effective a communication device they are. We hope the team at the hospital and visitors will appreciate the effort everyone has gone to make these units available."
